2019-12

Manager- Security ID Product & Customer Excellence

OCR Services, INC, Rockville, MD

- Managed the Security & Identity product suite,

producing \$250,000 in recurring product revenue

- Researched the competitive market space for Visitor Management, Identity Management, & Denied Person screening software applications to produce a product gap analysis & strategic development roadmap
- Wrote business requirement documents to enhance the security & identity product suite
- Communicated BRD with development teams and supported development & QA through the software development lifecycle process
- Managed cross-functional teams to execute Security & Identity product suite strategic milestones, including engineering, business development, & implementation groups, to increase new revenue streams
- Led implementation teams to ensure the successful rollout of the Security & Identity product via SaaS or On-Prem customer infrastructure models
- Compiled weekly status reports for the COO outlining schedule progress, financial status, and potential risks
- Led the creation of OCR Customer Excellence organization: its business model and value proposition focused on providing customer-focused services to retain the company's revolving revenue stream
- Was accountable for the day-to-day management of the OCR Customer Excellence office in Ocean City, MD, and responsible for all post-implementation customer-focused activities
- This included help desk inquiries, SLA management, account recurring training, E-learning content management, and user guide content management
- Established successful communication processes between business development, implementation, & customer excellence organizations to ensure optimal efficiency & transparency between the company's functional organizations
- Provided onboarding structure to new employees

and trained them on the organization's best practices & software solutions.

2010-09 -
2016-08

Business Analyst

OCR Services, INC, Rockville, MD

- Successfully managed ten medium-to-large-scale software implementations of the OCR EASE product suite to meet commercial and defense & aerospace customers' requirements
- Served as the Technical Account Manager for the tier-one customer base, accounting for \$400,000 in annual revenue
- Effectively documented customers' "problem statements" with complementing requirement definitions translated to the appropriate functional team
- Created Visio diagrams to document the "current state" business process, highlighting pain points, and presented the "future state" with a streamlined process flow, along with prototype UI application designs
- Led meetings with business stakeholders to gather and analyze complex requirements, developing tailored solutions that achieved business goals of automation, efficiency, and compliance
- These projects' outcomes created essential modules of the OCR EASE Product Suite, including Watch List Screening, Visitor Management, Export Operations, DSEA Management, & Commodity Classification
- Created and executed quality use case scenarios & traceability matrices to validate that the system design met client requirements
- Wrote product release notes, technical documentation, training materials, and user guides for assigned solutions
- Used critical thinking skills to resolve reported issues and leveraged the CRM tool to record account transactions
- Served as a subject matter expert for the Business Development team, conducting Product Solutions demos to prospective companies

- Assisted in completing RFI/RFP and Hosted IT Security Questionnaires that resulted in new sales
- Wrote and maintained company-wide IT Policies and Guidelines.
